

Hypercom® 35-Key T7 Plus Terminal

The Hypercom 35-Key T7 Plus is a powerful credit card terminal that combines the utility and performance you need with the simplicity you desire. The Hypercom 35-Key T7 Plus is equipped to process Visa, MasterCard, Discover, American Express, Diners Club, JCB cards, gift cards and loyalty cards as well as smart cards. The T7 Plus can also be combined with an external PIN-Pad to accept debit transactions, making it a complete transaction solution.

VERSATILE APPLICATIONS

The 35-Key T7 Plus supports a robust lodging application and is the ideal terminal for restaurants with easy to use tip-line and tip-adjust functions. The T7 Plus is also ready to process Electronic Benefits Transfer (EBT) transactions, the mandatory method for the distribution of cash benefits and food stamps and its high speed modem enables you to complete all transactions in seconds.

HIGH-SPEED PRINTER

The T7 Plus has a revolutionary SureLoad™ printer. This high-speed thermal printer simplifies paper loading and allows you drop the roll in place without feeding through slots and rollers. It also supports longer paper rolls for fewer paper changes and its see-through paper holder alerts cashiers to low conditions before running out of paper in the middle of a transaction.

SIMPLE INTERFACE

The T7 Plus' innovative key pad makes it one of the easiest terminals to operate. Instead of relying on function keys and key combinations, the T7 Plus has buttons that are specifically dedicated to performing simple operations.

ADD THE HYPERCOM 35-KEY T7 PLUS TERMINAL TO YOUR LOCATION TODAY

The Hypercom T7Plus is ideal for merchants looking for the perfect combination of utility and simplicity. Contact United Bank Card today for more details on this compact countertop POS terminal.
